Their shield against infection

protect them against
**ENTERITIS • DISTEMPER
SHOW-FEVER**

Many of the Country's leading breeders have adopted this simple, efficient ENTEROFAGOS method for the regular protection of their stock against the risk of microbic intestinal infection: ENTEROFAGOS Polyvalent Bacteriophage is supplied in glass ampoules, each containing one dose, which is given by mouth. ENTEROFAGOS is administered each week, with additional dosages immediately prior to Showing.

The product is completely harmless and safe to give at the first sign of trouble, even before the exact cause of infection has been diagnosed. Therefore, when in doubt, give ENTEROFAGOS immediately—freely and frequently. ENTEROFAGOS destroys the specific microbes that may be present, thus allowing the infected condition to clear up rapidly. If the infection has some other cause, ENTEROFAGOS prevents the microbic development which so often causes secondary complications.

For the treatment of associated conditions which show themselves in skin troubles, eye infections and catarrh, ANTIPEOL Ointment, OPTHALMO-ANTIPEOL and RHINO-ANTIPEOL have an impressive reputation with many of Britain's foremost breeders.
