Also in Class 31.

Tomorrow may be too late...

In the crowded conditions of a Show every cat runs the risk of exposure to infections. Feline Enteritis is a particularly infectious virus disease which can spread rapidly from cat to cat, and especially through a cattery, causing untold losses. The onset is sudden and the outcome usually fatal. All breeds of cats are susceptible but the incidence is higher among the Siamese. Get your veterinary surgeon to protect your cat with 'Fiovax' now; it may be too late after the Show.

Fix the vaccination date today

*What would you do with 10,000
cardboard plates?*

Say goodbye to washing-up for years and years? Or give a picnic tea for Dr. Barnardo's Homes? Or place them end-to-end in an endeavour to reach Oak Cottage?

At Oak Cottage we should have a use for them. Each year we serve 10,000 cat meals on cardboard plates—and throw the empties away.

This is just one of the many precautions against epidemics which make Oak Cottage Kennels the safest place to board your cat.
