IS IT NOTHING TO YOU?

MORE THAN TEN THOUSAND CATS IN 1958 WERE SACRIFICED IN LABORATORIES

Wilberforce campaigned against the slave trade, and the Earl of Shaftesbury campaigned against the employment of children in factories and mines.

Their opponents claimed that without slave labour the plantations could not be worked and without child labour the mines and factories could not survive. Slave labour was abolished and child labour was abolished, without loss to plantations, or to mines or factories.

The Earl of Shaftesbury was also a founder Member of the first-formed Anti-Vivisection Society, and we continue the campaign which he inaugurated for the abolition of this growing modern evil.

With your help, vivisection, too, can be abolished without detriment to medical progress. Don't be misled by claims to the contrary.

Their shield against infection

protect them against

ENTERITIS • DISTEMPER
SHOW-FEVER

Many of the Country's leading breeders have adopted this simple, efficient ENTEROFAGOS method for the regular protection of their stock against the risk of microbic intestinal infection: ENTEROFAGOS Polyvalent Bacteriophage is supplied in glass ampoules, each containing one dose, which is given by mouth. ENTEROFAGOS is administered each week, with additional dosages immediately prior to Showing.

The product is completely harmless and safe to give at the first sign of trouble, even before the exact cause of infection has been diagnosed. Therefore, when in doubt, give ENTEROFAGOS immediately—freely and frequently. ENTEROFAGOS destroys the specific microbes that may be present, thus allowing the infected condition to clear up rapidly. If the infection has some other cause, ENTEROFAGOS prevents the microbic development which so often causes secondary complications.

For the treatment of associated conditions which show themselves in skin troubles, eye infections and catarrh, ANTIPEOL Ointment, OPHTHALMO-ANTIPEOL and RHINO-ANTIPEOL have an impressive reputation with many of Britain's foremost breeders.
