Bigger and better litters!

Mrs. R. Garnett of 7 Glenhurst Rise, Upper Norwood, London, S.E.19, owner-breeder of the Anderida Russian Blue cats, writes:—

"I am sure you will be interested to know how my Russian Blue cats and kittens continue to thrive on your products. They all have Kit-zyme Tablets and Kenadex Extract regularly, starting from the time they are weaned. Pregnant and nursing queens also have Stress.

"They are brimful of energy from birth and not only that, the litters are increasing in numbers. We used to expect four, then there were five and next the sextuplets in the enclosed photograph."

Stop Press News: We have just heard that Anderida Maria is the proud mother of a new litter of eight! "Mother and babes doing well", says Mrs. Garnett, "thanks to your excellent products."

Their shield against infection

protect them against
**ENTERITIS • DISTEMPER
SHOW-FEVER**

Many of the Country's leading breeders have adopted this simple, efficient ENTEROFAGOS method for the regular protection of their stock against the risk of microbic intestinal infection: ENTEROFAGOS Polyvalent Bacteriophage is supplied in glass ampoules, each containing one dose, which is given by mouth. ENTEROFAGOS is administered each week, with additional dosages immediately prior to Showing.

The product is completely harmless and safe to give at the first sign of trouble, even before the exact cause of infection has been diagnosed. Therefore, when in doubt, give ENTEROFAGOS immediately—freely and frequently. ENTEROFAGOS destroys the specific microbes that may be present, thus allowing the infected condition to clear up rapidly. If the infection has some other cause, ENTEROFAGOS prevents the microbic development which so often causes secondary complications.

For the treatment of associated conditions which show themselves in skin troubles, eye infections and catarrh, ANTIPEOL Ointment, OPTHALMO-ANTIPEOL and RHINO-ANTIPEOL have an impressive reputation with many of Britain's foremost breeders.

CHAMPIONSHIPS

CHAMPIONSHIPS. Two Governing Council Championships will be granted where separate classes are scheduled for each sex, provided the total number of entries in the two classes is SEVEN OR MORE. In cases of amalgamation or where the total entry in the two classes is less than SEVEN, only the one Championship will be given.

The following rule was passed at the meeting of the G.C.C.F. held on the 10th July, 1935:

“When the number of Exhibits in the two Open Classes is below seven, only one certificate should be given. If, however, the winner of the opposite sex be of very high quality, the Judge may be empowered to give the second championship subject to the approval of another recognised judge of that breed.”

Beware Cat Thieves!

Every day, in many parts of the country, especially in London, cats are being stolen.

Cat thieves tour the streets at night in vans. (Always take the number of any vehicle you suspect). They carry bait to tempt any cats that may be out. Many cats fall easy victims, and are whisked away. Most of them never see their homes again. Their owners tramp the streets looking for them; they ask at the police stations and cat shelters; they advertise in the newspapers. But puss never comes back. Only the memory of him remains.

CATS SHOULD NOT BE OUT AT NIGHT

Never let your cat stay out at night. If you do, he may be picked up by thieves, and you will never see him again. It is **wrong** to put a cat out at night. Even in the daytime your pet is not really safe from thieves. Cats are sometimes stolen in daytime.

WHAT HAPPENS TO STOLEN CATS?

A few may be sold for their furs or for other purposes, **but most of them are sold for vivisection:** that is, for painful experiments in their living bodies. The thieves sell them to dealers, who re-sell them to vivisection laboratories. If you want to know what happens to them in the laboratories, send for our leaflet "Experiments on Cats."

ARE THIEVES EVER CAUGHT?

Sometimes, but not often. Below are particulars of some recent cases that came before the courts. If you will keep a sharp lookout there may be more prosecutions. **IT IS UP TO YOU.**

22nd June, 1961. At Downham Juvenile Court a boy was fined £5 for stealing a widow's cat. He sold it for 10/- to a man who had offered that sum for any cat brought to him.

10th August, 1962. The 'Edinburgh Evening News' reported that a livestock dealer had been fined £85 for having 252 stolen cats in his possession. Detectives discovered that he made his living by selling live cats to laboratories for 25/- apiece and skins of dead cats for 30/- each.

20th July, 1963. According to the 'Daily Mail,' reporting a case at the Pembrokeshire Assizes, at Haverfordwest, a detective told of an admission by Winston Hafferman that he kept coshes in his car for knocking out stolen cats in order to sell them to a laboratory in Cheshire.

All these stolen cats were destined for laboratories

TVL ENTEROVAX PROTECTS

At six weeks a kitten loses the natural immunity it gains from its mother's milk and becomes susceptible to the most deadly of cat diseases – Feline Infectious Enteritis. This killer strikes quickly; epidemics can sweep through a district without warning. Nine out of ten cats that contract the disease die; from first symptoms to death may be only a few hours; **THERE IS NO CURE.** The *only* safeguard against Feline Infectious Enteritis is to vaccinate.

Vaccination with TVL Enterovax will give your cat effective protection. Six weeks is the most suitable age to vaccinate, but a healthy cat can be vaccinated at any age. If your cat is to be shown, or is going into a cattery, vaccination is essential.

Ask your veterinary surgeon to protect your cat with TVL Enterovax Feline Infectious Enteritis Vaccine, and to give you a vaccination certificate.
