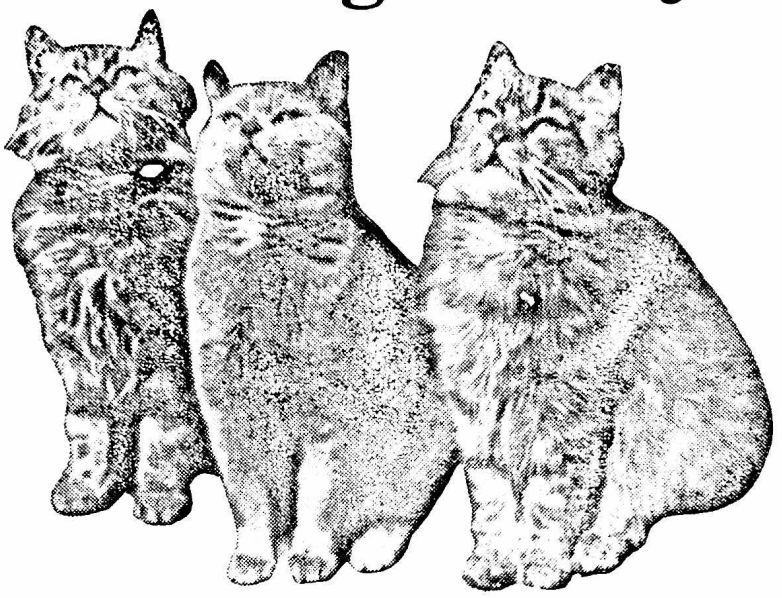
MBL

Their shield against infection



protect them against

ENTERITIS • DISTEMPER
SHOW-FEVER

Many of the Country's leading breeders have adopted this simple, efficient ENTEROFAGOS method for the regular protection of their stock against the risk of microbic intestinal infection: ENTEROFAGOS Polyvalent Bacteriophage is supplied in glass ampoules, each containing one dose, which is given by mouth. ENTEROFAGOS is administered each week, with additional dosages immediately prior to Showing.

The product is completely harmless and safe to give at the first sign of trouble, even before the exact cause of infection has been diagnosed. Therefore, when in doubt, give ENTEROFAGOS immediately—freely and frequently. ENTEROFAGOS destroys the specific microbes that may be present, thus allowing the infected condition to clear up rapidly. If the infection has some other cause, ENTEROFAGOS prevents the microbic development which so often causes secondary complications.

For the treatment of associated conditions which show themselves in skin troubles, eye infections and catarrh, ANTIPEOL Ointment, OPHTHALMO-ANTIPEOL and RHINO-ANTIPEOL have an impressive reputation with many of Britain's foremost breeders.

ENTEROVAX

TVL ENTEROVAX PROTECTS

At six weeks a kitten loses the natural immunity it gains from its mother's milk and becomes susceptible to the most deadly of cat diseases – Feline Infectious Enteritis. This killer strikes quickly; epidemics can sweep through a district without warning. Nine out of ten cats that contract the disease die; from first symptoms to death may be only a few hours; THERE IS NO CURE. The *only* safeguard against Feline Infectious Enteritis is to vaccinate.

Vaccination with TVL Enterovax will give your cat effective protection. Six weeks is the most suitable age to vaccinate, but a healthy cat can be vaccinated at any age. If your cat is to be shown, or is going into a cattery, vaccination is essential.

Ask your veterinary surgeon to protect your cat with TVL Enterovax Feline Infectious Enteritis Vaccine, and to give you a vaccination certificate.

HENGIST RUSSIAN BLUES

Our Stud, **PETROVNA NILGIRI BOY,** or **Roman,** as we call him (that's short for **Romanov,** in case you wondered how a Russian came by a name like that) is marked by his friendliness and courtesy. When one of his wives tries to share his dinner, he shows no impatience, but merely keeps her at arm's length with a firm, velvet paw. When I'm too busy to pick him up, he climbs up my leg—but, being so gentle, he refuses to put out his claws. His progress is consequently nil; but he will not give up till he sits, proof of his mastery over me, purring in my arms.

Roman's a good stud, for his gentility (as is so often the case) goes with a strong character. When a queen rolls or kicks or places her tail firmly between her legs he copes patiently and competently. When a mated queen attacks him, he sits just out of range, unsurprised, sympathetic like Buddha.

ROMAN'S here today, while his wives, PLUSHA and PICCOLA, are at home with his boisterous children who are looking for new homes to explore. If your house has enough forbidden corners, if there are plenty of rules to break and if you **think** you can cope with one of these rascals, they'd be delighted to own you. (They might even allow you to show them from time to time.)

Beware Cat Thieves!

Every day, in many parts of the country, especially in London, cats are being stolen.

Cat thieves tour the streets at night in vans. (Always take the number of any vehicle you suspect). They carry bait to tempt any cats that may be out. Many cats fall easy victims, and are whisked away. Most of them never see their homes again. Their owners tramp the streets looking for them; they ask at the police stations and cat shelters; they advertise in the newspapers. But puss never comes back. Only the memory of him remains.

CATS SHOULD NOT BE OUT AT NIGHT

Never let your cat stay out at night. If you do, he may be picked up by thieves, and you will never see him again. It is **wrong** to put a cat out at night. Even in the daytime your pet is not really safe from thieves. Cats are sometimes stolen in daytime.

WHAT HAPPENS TO STOLEN CATS?

A few may be sold for their furs or for other purposes, **but most of them are sold for vivisection:** that is, for painful experiments in their living bodies. The thieves sell them to dealers, who re-sell them to vivisection laboratories. If you want to know what happens to them in the laboratories, send for our leaflet "Experiments on Cats."

ARE THIEVES EVER CAUGHT?

Sometimes, but not often. Below are particulars of some recent cases that came before the courts. If you will keep a sharp lookout there may be more prosecutions. IT IS UP TO YOU.

22nd June, 1961. At Downham Juvenile Court a boy was fined £5 for stealing a widow's cat. He sold it for 10/- to a man who had offered that sum for any cat brought to him.

10th August, 1962. The 'Edinburgh Evening News' reported that a livestock dealer had been fined £85 for having 252 stolen cats in his possession. Detectives discovered that he made his living by selling live cats to laboratories for 25/- apiece and skins of dead cats for 30/- each.

20th July, 1963. According to the 'Daily Mail,' reporting a case at the Pembrokeshire Assizes, at Haverfordwest, a detective told of an admission by Winston Hafferman that he kept coshes in his car for knocking out stolen cats in order to sell them to a laboratory in Cheshire.

All these stolen cats were destined for laboratories
