Bigger and better litters!

Mrs. R. Garnett of 7 Glenhurst Rise, Upper Norwood, London, S.E.19, owner-breeder of the Anderida Russian Blue cats, writes:—

"I am sure you will be interested to know how my Russian Blue cats and kittens continue to thrive on your products. They all have Kit-zyme Tablets and Kenadex Extract regularly, starting from the time they are weaned. Pregnant and nursing queens also have Stress."

"They are brimful of energy from birth and not only that, the litters are increasing in numbers. We used to expect four, then there were five and next the sextuplets in the enclosed photograph."

Stop Press News: We have just heard that Anderida Maria is the proud mother of a new litter of eight! "Mother and babes doing well", says Mrs. Garnett, "thanks to your excellent products."

Their shield against infection

protect them against.
**ENTERITIS • DISTEMPER
SHOW-FEVER**

Many of the Country's leading breeders have adopted this simple, efficient ENTEROFAGOS method for the regular protection of their stock against the risk of microbic intestinal infection: ENTEROFAGOS Polyvalent Bacteriophage is supplied in glass ampoules, each containing one dose, which is given by mouth. ENTEROFAGOS is administered each week, with additional dosages immediately prior to Showing.

The product is completely harmless and safe to give at the first sign of trouble, even before the exact cause of infection has been diagnosed. Therefore, when in doubt, give ENTEROFAGOS immediately—freely and frequently. ENTEROFAGOS destroys the specific microbes that may be present, thus allowing the infected condition to clear up rapidly. If the infection has some other cause, ENTEROFAGOS prevents the microbic development which so often causes secondary complications.

For the treatment of associated conditions which show themselves in skin troubles, eye infections and catarrh, ANTIPEOL Ointment, OPHTHALMO-ANTIPEOL and RHINO-ANTIPEOL have an impressive reputation with many of Britain's foremost breeders.

TVL ENTEROVAX PROTECTS

At six weeks a kitten loses the natural immunity it gains from its mother's milk and becomes susceptible to the most deadly of cat diseases – Feline Infectious Enteritis. This killer strikes quickly; epidemics can sweep through a district without warning. Nine out of ten cats that contract the disease die; from first symptoms to death may be only a few hours; **THERE IS NO CURE.** The *only* safeguard against Feline Infectious Enteritis is to vaccinate.

Vaccination with TVL Enterovax will give your cat effective protection. Six weeks is the most suitable age to vaccinate, but a healthy cat can be vaccinated at any age. If your cat is to be shown, or is going into a cattery, vaccination is essential.

Ask your veterinary surgeon to protect your cat with TVL Enterovax Feline Infectious Enteritis Vaccine, and to give you a vaccination certificate.

of cats

Feline infectious enteritis is a highly infectious and dangerous disease of cats: it kills 9 out of 10 of those that contract it. Treatment is usually unsuccessful. The best protection against this dreadful disease is vaccination with FEV. Choose a time when your cat is fit and healthy then ask your veterinary surgeon about protection with FEV feline infectious enteritis vaccine.
