# Your kitten and the Killer Disease

## A new way to protect him

Cat Killer No. 1 – Feline Infectious Enteritis – spreads like wildfire. And it's still common. You can't shut your kitten up against infection. And once he contracts it, there's little that you – or even your veterinary surgeon – can do to save him. Too late to be sorry, then.

### **DON'T LET IT HAPPEN**

Ask your veterinary surgeon about his first dose of new FIOVAX TC at 7 weeks. New double dose Fiovox TC is recommended to be used so early because it could give your kitten vital weeks of extra protection. This may well be a matter of life or death – because kittens are more susceptible to Feline Infectious Enteritis than grown cats. Whether or not a previous dose of FIOVAX TC has been given, a dose at 12 weeks of age is essential.

Kittens over 12 weeks and adult cats may be immunized with one injection only.

**NEW DOUBLE DOSE**
