Even nine lives shouldn't be taken for granted.

Even nine lives are no protection against feline infectious enteritis. This disease is a killer and kittens are particularly vulnerable.

Fortunately, there is a swift and simple way of protecting your cat. FIOVAX Vaccine provides safe, effective protection against this disease.

Ask your veterinary surgeon for advice about vaccination.

PATRON: HER GRACE LAVINIA DUCHESS OF NORFOLK

JAWS was founded in Tokyo in the mid-nineteen fifties with Anglo-American initiative and much Japanese support.

It remains an international Society dealing with animal problems peculiar to Japan.

These problems arise in the main from a basic religious tenet which prohibits the taking of life, however necessary this may be by western veterinary and animal welfare standards.

Because of this tenet, unwanted pets—mainly cats and dogs—are abandoned rather than being put down. This leads to an almost uncontrollable stray problem and to stray cats and dogs being rounded up for extermination—by the few Japanese who will undertake such duties—often in circumstances of unimaginable horror.

Such strays are sometimes used for medical experiments and left to die unattended with their surgical wounds unsutured.

**Please help us
to help
the animals
in Japan**

LIMITED

As a result of unrelenting pressure from JAWS and other animal welfare bodies an Animal Protection law was passed in 1973, but with no Inspectorate to police it, there are few, if any, prosecutions and things remain much as they were.

JAWS have a young Japanese Veterinary Surgeon training in animal welfare procedures in Canada and the UK and hope, from this beginning, to establish a small corps of trained RSPCA type Inspectors.

They have also a large animal rescue centre in the Kobe/Osaka area and aim to establish another in or near Tokyo. It is an uphill task and we badly need your help.

**We depend entirely on
voluntary contributions.**

**Please help and be as
generous as you can.**
