# Original protector

Before C-Vet introduced Feliflu vaccine there was no vaccine available in the U.K. to protect cats against feline viral rhinotracheitis, calicivirus and feline panleucopaenia.

Feliflu was the first vaccine proven to have a full 12 months of protection from challenge for all components. Only Feliflu contains the F-9 strain of calicivirus which cross protects against all strains of calicivirus.

No other vaccine offers as much protection, as much clinical proof of performance or as many years of proven efficacy and safety as Feliflu... the original protector.

# Feliflu<sup>®</sup>

## The flexible family of feline vaccines

# Leukassay F

**A testing system for  
the fast identification of  
FeLV-infected cats**

Feline Leukaemia  
Virus (FeLV) is  
commonly associated  
with many diseases of  
cats. It is not only a  
cause of lymphosarcoma  
but may induce a  
'fading kitten' syndrome,  
blood disorders or  
reproductive failures.

Periodic testing by your  
veterinary surgeon using  
the Leukassay F testing  
system can help identify  
infected cats.
