## ***From the Chairman of the G.C.C.F. . . .***

The Supreme Show Committee welcome you to the Sixth Supreme, and we hope you have an interesting and a successful day.

The new May date has not affected the entries greatly although there is a decrease in the number of Kittens entered, and in the British exhibits. The Bingley Hall has two halls in use today, and we have decided to place the whole of the Long Section in one hall and all the remaining cats including the Household Pets in the second hall. The Long Hair open class judging will take place in the centre of the Long Hair hall; all the other open class judging and all the Best of Breed judging will take place in small rings in front of the tiered seating. The Supreme judging will be held on the centre platform in the Short Hair hall. We hope the seating will enable everyone to have a better view of the judging, in comfort.

You will find the official Governing Council Stall near the main platform, if you have any queries about the work of the Council, or about the Show, including 'table' enquires please come to this stall.

Two Registrars will be working on the stall and I hope to be there from time to time.

We are looking forward to entertaining Miss Beryl Reid, who is to judge some Household Pet Classes and will join the panel for the Supreme Household Pet judging.

This year we have a big increase in the number of stalls at the show, and we are hoping for a good gate to try and make the Supreme financially self supporting. It is not the policy of the Council to make a large profit on the Supreme but the delegates frequently express the hope that there will be no loss either.

I would like to give my thanks to all those who have:—

Provided special prizes for the show;

Helped the committee members with the design and content of the catalogue;

Helped in the preparation of the show hall;

Distributed publicity material for us, or helped and supported us in any other way.

Lastly my personal thanks to all the Committee Members who have worked so hard to make the show possible.

We look forward to welcoming you back to the 1983 Supreme, which will return to the Bingley Hall on Saturday, 8th January.

LESLEY PRING.

## CATALOGUE

Ever since the first cat show was held in 1871, fanciers have had standards of excellence to aim for. At first there was minimal mention of the shape of the cats, the breeds differing mainly in coat length and colour, but the standards evolved, the breeds changed gradually and cats today are bred in a dozen distinct shapes.

Despite the differences in shape (or "type"), essential to the various breeds, no standard of points calls for extreme deviation from the basic mongrel cat shape and size and deformities are severely penalised in most breeds, so that today's cats still move, feed and breed naturally.

## LONG-HAIR SECTION

## LONG-HAIRED ADULTS

*Most of our Long-haired breeds are "Persian" in type, varying only in their coat colour, markings and eye colour. The body is cobby with sturdy legs, a short tail and a broad round head with a short nose, small ears set wide apart and large round eyes; the effect is one of roundness and solidity, enhanced by the beautiful coat which should be long, dense and silky.*

**Breed No. 1—Black**

*One of the earliest long-haired breeds, this "Persian" type cat is distinguished by the magnificent contrast of its deep orange or copper eyes and its lustrous raven black coat.*

# CREST blended seaweed

## “Nature’s Gift to Cats” used by top Supreme breeders

Even the best fed domestic animals suffer from deficiencies in their diet which were unknown when in their wild state. Then, cats and dogs killed their food and before eating the flesh always consumed much of the stomach and its contents, blood, liver and intestines. These gave them the necessary elements and minerals essential to keep them in the peak condition necessary for survival. Man-made diets, even the best of them, cannot supply the full range of these vital elements and therefore many of our domestic animals suffer not only from deficiencies but also minor infections which do not show themselves but which keep the animals below par and reduce resistance to serious diseases. Such conditions show themselves in poor coats, listlessness, poor appetite, nerves and in many other ways.

It is known that the sea contains every known element and it is from this source that Sea Products Research Ltd. have produced CREST which, added to ordinary diets, provides the answer to these problems.

CREST is a mixture of many pure seaweeds which, when skilfully blended, make up a perfectly balanced and complete range of interacting MINERALS, TRACE ELEMENTS, AMINO ACIDS and VITAMINS in a safe and natural form. Special blending also ensures the presence of high NATURAL CALCIUM and MAGNESIUM, which not only aid the correction of deficiencies but also ensure strong healthy bones and teeth in all cats and dogs, particularly in young animals. NATURAL IODINE is also present in the correct quantity to keep both animals and birds in peak condition.

**Using CREST no other additives of any kind are necessary, even for in-whelp bitches and pups and in-kit queens and kittens.**

All seaweeds blended in CREST are hand cut and gathered from remote Atlantic coasts where contamination is unknown. **CREST contains no synthetic materials or drugs of any kind.** It is, therefore, a completely safe product and it is not dangerous to exceed the recommended dose.

CREST should be fed right through your animal's life, but after mixing in CREST with the daily feed at the recommended levels for four weeks you will begin to see improvement in general fitness and in the following conditions:—

### CATS AND DOGS

- |   |  |
|---|--|
| (a) Skin and coat condition.  | (e) Appetite.  |
| (b) Poor pigmentation when due to deficiencies.                           | (f) Nervous disorders and excitability when due to deficiencies. |
| (c) Eczemas, skin irritations and rashes due to overheating of the blood. | (g) Digestibility and elimination.                               |

## RESULTS

**Ereed No. 13c—Birman**

*This is one of the few longhair breeds which differs in type, although it should still be massive and well-rounded; the body, legs and tail are a little longer than in the "Persian" and the ears slightly larger, while the nose is straight and of medium length. The eyes are almost round and must be a deep blue. The coat is long and silky. Two colours are recognised—Seal Point, with dark brown points and a golden brown body, and Blue Point with blue-grey points and a bluish-white body. The unique characteristic of this breed is its white feet, the front feet having white "gloves" to cover the toes and the hind feet white "gauntlets" covering the paws and tapering up the back of the leg to the hock.*

TRIBUTE TO THE CAT

**THE CAT** brings calm  
in times of  
trouble, solace to the solitary, and  
blessed moments of humour.

He earns our respect by the dignity of  
his demeanour, his independence, and  
intelligence in making his wishes  
known. He delights the eye by his  
agility and grace, reduces our self-  
importance by the directness of his gaze,  
and cheers us by the charm of his  
clowning.

Selective in bestowing affection, he is ever  
generous in giving companionship,  
leaving us to learn from the wisdom of  
his composure.

Superbly produced. Ready to frame. Size 8½ x 12". £1 each  
plus 20p p. & p. (up to 3 for same postage)

**“Nature’s Gift to Cats”**  
*used by top Supreme breeders*

**AND YET ANOTHER CREST SUPREME WINNER . . .**

**Champion Zachary Bat Girl**  
 SUPREME KITTEN 1981

Bred by Mrs. Janet Lynn, breeder of the successful “Zachary” Cats, who says:

“I had problems with “Bat Girl’s” coat until another breeder recommended CREST. Within eight weeks of using Crest, “Bat Girl’s” coat was in superb condition. Since then I have fed Crest daily to all my cats and kittens to keep them in peak condition. Crest is really a marvellous supplement, and so reassuring to know that it is totally natural and safe.”

**Cat's No. Class 48.—LILAC, Female**

Judge: Mrs. J. Hogan

- 155 Ms. R. McCutcheon, OXUS FAFAlA.  
23.8.78. Minabel Marsh Harrier x Oxus Viola Damore.  
Breeder, Exhibitor.

**Breed No. 51—Red Cameo**

*The colours of these "Persian" type cats are the red and tortie equivalents of the Chinchillas, Pelters and Smokes, with undercoats as white as possible. All have deep orange or copper eyes.*

*The Shell Cameo (51/1), is the lightest marked having only red tips to the hairs.*

*The Shaded (51/2), is more heavily marked with red, while the Red Smoke (51/3, is, as its name says, the red version of a Smoke longhair. The Tortie Cameo (51/4, has black and red patches in any of the three colour intensities.*

**Class 49.—RED CAMEO, Male**

Judge: Mrs. J. Hogan

- 156 Mr. and Mrs. D. Leigh, CABRIOLE CAMEO TRISTAN.

## SHORT-HAIR SECTION

### BRITISH SHORT-HAIRED ADULTS

*The British Shorthair is a powerful compact cat with a sturdy body and legs, a shortish tail and a round head with small, widely-spaced ears, large round eyes and a short straight nose. The coat is short and dense, not fine and close like the Siamese, but with no fluffiness to it.*

#### Breed No. 14—Blue-eyed White

*Again, three white breeds are recognised, the coats being pure white and the eye colour of the first being deep sapphire blue.*

**Breed No. 25—Manx**

*This is the only breed in the British Shorthair section which does not have true British type. The major difference, of course, is the complete absence of tail, but there are other minor points—the back is short and the hind legs are longer than the front ones, the nose is longer than in the British and the ears are taller. The coat also has a slightly different quality as the hairs of the outer coat are longer than those of the thick undercoat. The coat and eye colour should preferably conform to those of other British Shorthairs but are of far less importance than the other features of the breed.*

## FOREIGN SHORT-HAIRED ADULTS

## FOREIGN SHORT-HAIRED ADULTS

The Foreign Shorthair section encompasses seven separate shapes of cat, three of which are further sub-divided by colour. The Foreign breeds lack the chunky solidity of the British Shorthair and the Longhair, having instead an elongated elegance.

## Breed No. 16a—Russian Blue

This breed has a long, graceful body and legs with a fairly long tail and a short wedge shaped head with a straight nose. The "Russian" look is created by the large ears set on top of the head, the prominent whisker pads either side of the nose and the almond shaped, vivid green eyes. However, the truly distinctive feature of this breed is its short, thick, fine, clear blue coat which stands up from the body and shows a beautiful silvery sheen.

**Breed No. 23—Abyssinian**

*The Abyssinian is of a similar medium foreign build to the Russian, but with a very different expression, the ears being set wide apart on the gently curved, medium wedge head, while the large oriental eyes are amber, hazel or green. The coat is very short and fine, each hair having two or three bands of colour on it, thus giving the breed its distinctive ticked appearance.*

*The Usual Abyssinian should be a rich golden brown with an apricot base colour and black ticking, black tail tip and black markings up the back of the hind paws.*

**Breed No. 27—Brown Burmese**

*The Burmese is another breed of medium foreign type, neither cobby nor extreme like the Siamese, but highly distinctive. The tail tapers only slightly and the head has a gently rounded look to its blunt wedge, with a distinct nose break. The medium size ears are set well apart and tilt slightly forward and the gently slanting eyes, neither round nor oriental, vary in colour from chartreuse, through the ideal golden-yellow, to amber. The colour of the Brown Burmese is a rich, warm seal-brown, marginally darker on the mask and ears and fading slightly to a lighter shade beneath.*

*This is another breed with medium foreign body type but with particularly long legs and tail. The head is a medium wedge with a straight nose, large ears set rather high and medium sized oval eyes. The coat is short and plushy with a highly characteristic wave or curl to it, producing ripples all down the body to the tip of the tail; even the eyebrows and whiskers are crinkled. The coat may be of any colour, although the white markings on bi-colours must be symmetrical. The Siamese-coloured Cornish Rex must have blue eyes, but the other colours may have eye colour in keeping with their coats of green, yellow or chartreuse.*

**Breed No. 33a—Devon Rex**

*The Devon is quite unlike any other breed of cat. The slender body is of medium length, the tail and legs are long, especially the hind legs, and the elegant neck tends to emphasise the head: this is wedge-shaped with full cheeks, a short muzzle, a strongly marked stop to the nose and large oval eyes. The big, wide-based ears are set rather low on the head and the whisker pads are noticeable, particularly since the whiskers are crinkled. The coat is very short, fine and soft and its waviness helps create the unique character of this breed. All coat colours except bi-colour are acceptable and the eye colour is the same as in the Cornish Rex.*

## RESULTS

## SIAMESE SECTION

## SIAMESE ADULTS

*The Siamese type is the most elongated of all, but beautifully balanced, with a long, svelte body, fine legs and feet, a long tapering tail and an elegant neck. The head is a long wedge shape, the large ears following the same straight lines, and the oriental eyes slant towards the nose. The coat is very short, fine, glossy and close-lying. The colour is, of course, highly distinctive, the eyes being clear bright blue and the beauty of the coat lying in the contrast of the darker points and paler body colour.*

**Breed No. 24—Seal-Point**

*The points are clearly defined dense seal-brown and the body is cream, shading to warm fawn on the back.*

*All ten points colours are also obtainable in Tabby Points, where both the points colour and body colour are equivalent to those in the solid colour versions. The mask is striped, with spotted whisker pads, the tail shows clear rings and the legs have broken stripes. The ears have paler central areas known as "thumb marks" although these often do not show on blue tabbies or on the tortie-tabbies where the ears are mottled.*

## NON-PEDIGREE HOUSEHOLD PET SECTION

We would like to acknowledge, with thanks and great pleasure, the presence of Beryl Reid and Lesley Judd who have kindly come to our show to judge these beautiful cats in this section.

### NON-PEDIGREE HOUSEHOLD PETS

*Since these cats have no pedigrees they do not conform to any particular breed standard, but do fall into certain categories such as long or short haired, plain or "self" coloured such as black, white or blue, or non-self such as tabbies, tortoiseshells or white-marked cats. The essential qualities of these household pets are that they are happy, much-loved examples of the non-pedigree cat who are being shown in sparkling tip-top condition: naturally one looks more beautiful to one person, a different one to the next, but they are all beautiful in the eyes of their owners.*
