# Original protector

Before C-Vet introduced Feliflu vaccine there was no vaccine available in the U.K. to protect cats against feline viral rhinotracheitis, calicivirus and feline panleucopaenia.

Feliflu was the first vaccine proven to have a full 12 months of protection from challenge for all components. Only Feliflu contains the F-9 strain of calicivirus which cross protects against all strains of calicivirus.

No other vaccine offers as much protection, as much clinical proof of performance or as many years of proven efficacy and safety as Feliflu ... the original protector.
