There is a British vaccine which gives combined protection –

**In a world of starving millions, battered babies
and wars, why should you care about
5 million experiments
on live animals ?**

Because man's inhumanity to man has many different well-springs. One of them is a cynical indifference to animal suffering which, if we're a party to it, brutalises all of us. In this country we are a party — all of us — to 5 million painful experiments on animals a year. But there are alternatives — some already successfully used. We're for progress — but not at the price of human regression. We ask that the Government now makes a real effort to look at the alternatives. Join us in this reasonable campaign. It is important for humanity.

I enclose a contribution of £..... to support you in your aims to press for alternatives to the exploitation of live animals in research. I agree with your aims to promote such alternatives.
