PURTECT

Protects

You can protect your cat against the three unpleasant and sometimes fatal diseases: feline viral rhinotracheitis and calicivirus disease (the major causes of cat flu) and feline panleucopaenia (infectious enteritis).

There is a British vaccine which gives combined protection –

PurTECT – a simple painfree injection. So, for cats of all ages avoid the worry and distress that these diseases can cause and make sure they receive the best of British protection. Ask your veterinary surgeon about PurTECT, now.

PurTECT

(trade mark)

Great British protection against the major feline diseases.

An informative leaflet on vaccination and cat care is available from your veterinary surgeon or from Glaxovet Limited, FREEPOST, Harefield, Uxbridge, Middlesex UB9 6BR.

THE BLUE CROSS

The Blue Cross provides veterinary treatment for cats and other small animals belonging to people who are genuinely unable to meet the full cost of treatment. We would gladly welcome your support in maintaining these costly services.

WISHING EVERY SUCCESS TO THE BEAUTIFUL CATS ON SHOW TODAY. We trust that you take care to protect them against the three common infectious diseases: Enteritis, Influenza and Leukaemia.

HAVE YOUR CATS AND LITTERS OF KITTENS VACCINATED AGAINST ENTERITIS AND INFLUENZA AND KEEP UP TO DATE WITH BOOSTER INJECTIONS.

BEWARE OF FELINE LEUKAEMIA—the main spread of this virus is by carrier cats which may look very healthy. Only blood tests can show that cats are not infected. Steer clear of non-tested cats and kittens.

Leukaemia Virus is passed on by licking and mating. The quarantine period, after contact with a possible infected cat, is three months, followed by a blood test.

IF YOU BREED CATS, TEST EVERY CAT IN YOUR HOUSE — EVERY YEAR.
