ringworm research project

THE SKIN DISEASE resulting from ringworm infection is often mild and localised; in some cats it can become severe and/or generalised at times involving secondary bacterial infections and causing considerable distress to the cat. Some of these infections prove very prolonged and can be extremely difficult to cure.

THE RISK OF SPREAD OF INFECTION TO MAN is of considerable importance as the disease, particularly in children, can be very severe. Concerns over the risk of infecting children may result in the euthanasia of cats in some households.

CATS WITH RINGWORM SUFFER from the loneliness of prolonged isolation, the unpleasantness of long periods of medication and the discomfort of shaving and bathing, which is often necessary.

THE SUPREME SHOW IS OPEN TO ALL QUALIFIED CATS

Full details are given in the schedule but basically the Supreme is open to all titled cats, all cats that have won one or more certificates. Kittens born on or after 1st September 1992 and are adult by the day of the show may qualify by winning a kitten open class at a GCCF Championship show. The Show Committee has decided that for this year KITTENS WILL NOT BE ACCEPTED in the pedigree section. This situation will be reviewed for the 1994 show. Non-pedigree exhibits must have won an open class at a GCCF championship show or a Whiskas heat as appropriate.
Schedules will be available at the GCCF Stalls, or by post from the GCCF Office 4-6 Penel Orlieu, BRIDGWATER, Som. TA6 3PG from late June. Please send a large S.A.E. (9" x 7").
