Welcome to our 1st Championship Show

We hope you enjoy your visit and seeing the various varieties of pedigree cats who are presented here in tip top condition and appearance. Many exhibitors will only be too pleased to talk to visitors about their breeds.

The committee are very grateful for the support and contributions given to help make this show a success, a full list of the many specials is printed in the back of the catalogue.

We hope you have an enjoyable and successful day and look forward to seeing you all again next year at Weston-super-Mare on 7th June 1997 (date applied for) at a new spacious venue.

Have a safe journey home.

**Exhibitors:-** If your cat has won a champion or premier title here today please make your claim to the GCCF office. You should include the cat's name, Breed Number, Sex, Breeder's name, Owner's name and address and the names and dates of the three shows together with the awarding Judges' names. All claims are acknowledged. Periodically a list of Champions etc. is published in CATS and shortly after medals are sent from the office to Owners. A Show Season runs from June to May.

**Applying for a Prefix:-** Breeding Prefixes cost £50 and applicants must be a member of a GCCF affiliated cat club at the time of application. Forms are available from the office.

**Registrations and Transfers:-** Forms for registration and transfer are available from the office.

**Certificate of Entirety:-** All male cats that are used at stud for the first time must have Certificate of Entirety deposited with the GCCF, prior to the registration of their first litter of kittens. Established stud cats must have their certificate deposited by 31 December 1996. Official GCCF Certificates of Entirety are now available from the office on receipt of a large stamped addressed envelope together with the registered number and name of the cat. No fee is charged by the GCCF for the certificate and once it has been signed by your veterinary surgeon it should be returned to the GCCF office. Owners are recommended to make a photo copy so that they can show it to the owners of queens using their cat at stud.

# The Silver Series Cat Club

For some time many breeders and exhibitors of Silver Series cats in the British Shorthair section have formed themselves into a sort of informal 'society'. This has happened gradually as a direct result of the breeding lines in use being so very inter-related (indeed, limited) and the consequent need for close communication.

As a result of the rapid introduction and popularity of sex-linked and genetically recessive colours, together with the recognition of such colours by the GCCF to Championship status, it was felt that Silver Series breeders and owners from all sections have need of a formal society which caters solely for their needs.

The germ of the idea (not taken seriously at first) developed during a telephone conversation between Celia Leighton and Alan Edwards, both senior GCCF judges. Unwittingly a niche had been identified.

There is absolutely no intent to undermine the wonderful work being undertaken by the 'senior' clubs in any section of the Cat Fancy, but the time appears to be ripe for the energies of Silver Series breeders and owners to concentrate their forces upon the problems and challenges which are bound to arise as the whole field of Silver Series breeding is so dramatically widened. The 'senior' clubs have a much broader view to take, and a wider range of issues to address.

If you are interested/concerned about the problems and delights of this enigmatic range of colours; if you wish to become part of an increasingly wide-ranging group of friendly, tolerant yet serious breeders working with Silver Series cats throughout the Cat Fancy; then please contact (with SAE) for further details and membership application form:

The Cat Welfare Trust

project ringworm research

THE SKIN DISEASE resulting from ringworm infection is often mild and localised; in some cats it can become severe and/or generalised at times involving secondary bacterial infections and causing considerable distress to the cat. Some of these infections prove very prolonged and can be extremely difficult to cure.

THE RISK OF SPREAD OF INFECTION TO MAN is of considerable importance as the disease, particularly in children, can be very severe. Concern over the risk of infecting children may result in the euthanasia of cats in some households.

CATS WITH RINGWORM SUFFER from the loneliness of prolonged isolation, the unpleasantness of long periods of medication and the discomfort of shaving and bathing, which is often necessary.
