POPPYLEA WILLIAM TAIL 70 20a

(Blue Tabby Colourpoint carrier Exotic)

Cat wise we have had a quiet few years since the birth of our daughter, "Poppylea Anna Lister". Thanks to the help of our friends we now have some lovely new girls who will be on the bench this year. Not forgetting **JOHNNYCAKE JAMMIN JANET** and **HILAL DOLLY DUMPLING** who are already giving us some wonderful kittens.

Congratulations to our friends who go right back to when we started and are now judges or on their way to being judges. It will add a bit of extra fun to exhibiting!!!

project ringworm research

THE SKIN DISEASE resulting from ringworm infection is often mild and localised; in some cats it can become severe and/or generalised at times involving secondary bacterial infections and causing considerable distress to the cat. Some of these infections prove very prolonged and can be extremely difficult to cure.

THE RISK OF SPREAD OF INFECTION TO MAN is of considerable importance as the disease, particularly in children, can be very severe. Concerns over the risk of infecting children may result in the euthanasia of cats in some households.

CATS WITH RINGWORM SUFFER from the loneliness of prolonged isolation, the unpleasantness of long periods of medication and the discomfort of shaving and bathing, which is often necessary.
