Asian Group Cat Society

Welcome to the Society's First Championship show, we hope that you find the experience an enjoyable one. We would also like to welcome the Selves, in their first Championship status season. Hopefully the Tiffanies will not be long in completing the Group's presence at Championship level.

We would like to think that the AGCS has expanded on the ideals of the late Miranda von Kirchberg in attempting to popularise all of the varieties and by achieving this mile stone of being the first Championship breed show.

In the interests of safety and for the comfort of exhibits please observe the following:

Smoking is not permitted within the confines of the hall.

Please do not handle the exhibits or put fingers into the pens as this could transmit infection.

Please walk, do not run in the hall, speak quietly.

Please be considerate to judges and stewards, give way to them if they need to pass you, do not crowd them or push past.

Thank you for observing the above and on behalf of the committee may I wish you a successful and enjoyable day, together with a safe journey home.

See you all next year!

Samdra Devereux
Show Manager.

The Cat Welfare Trust

PLEASE SUPPORT THE GENOME MAP PROJECT

The Trustees have now chosen the second project after an excellent response from the Veterinary Schools and organisations approached. It has been decided to support the project proposed by Dr Matthew Binns of the Animal Health Trust.

The Animal Health Trust has been working on the production of genome maps for horses and dogs. These maps are an essential tool for the study of genetics in any species and Dr Binns will now extend this study to produce a map for cats. This work has already started in the United States and it will be a great asset for cat breeders in this country to have the benefits of this research easily available to them. The project will produce information about inherited disease and enable such problems to be identified by simple blood test. Programmes can then be developed for the elimination of disease from the breed in the most positive and caring way. The work on the genome map and the following research will take time and funding from other sources but it will be the Cat Welfare Trust grant which will enable the work to commence.

Work started on the project at the beginning of the year 2000 and will be funded for two years. The Trustees need your support to provide money to enable the to make this grant and to produce further funds to undertake future projects for the benefit of our cats. The excellent response received for this project has confirmed the Trustee's belief that there are many worthwhile projects needing their support in the future. It is now possible to obtain a tax rebate on millennium gifts under the Gift Aid rules. Details of this scheme are available from your local tax office.

The final results from the Ringworm Project are now available.
