

ORIENTAL SECTION

The Orientals have the elongated foreign type of the Siamese, with the same elegant length of head, neck, body, legs and tail and the very short, glossy coat, but lack the gene which restricts the colour to the points. They are recognised in ten self colours and seven tortie colours, together with their silver versions, in a variety of patterns giving a total of over two hundred different colour schemes. The section also includes the Angora, the Oriental semi-longhair.

PRELIMINARY STATUS ORIENTAL BREEDS

The breeds in Assessment Classes are still at the earliest stage of recognition by the GCCF. Instead of having an Open Class, each cat is assessed individually against the standard of points for its breed; the judge then decides whether or not the cat conforms sufficiently closely to its standard to be awarded a Merit Certificate.

Oriental Bicolour – Breed Nos. 48, 49

These are bred in all Oriental colours and patterns, plus the pointed (Siamese) versions of these colours and patterns, with both short (48) and semi-long (49) coats. They must have a minimum of one third white, with white on the face, feet and along the underside, up to van distribution of white. The pointed cats all have blue eyes, but the non-pointed cats may have green eyes, one green and one blue or even two blue eyes.
