FOREIGN SECTION

The Foreign section encompasses twelve separate shapes of cat, further subdivided by coat and colour. They have a lithe elegance, intermediate in type between the chunky solidity of the Persians and British Shorthairs and the elongation of the Siamese and Orientals. They all have short coats except the Tiffanys which are included in this section because they are part of the Asian group.

FOREIGN ADULTS

Russian Blue - Breed No. 16

This breed has a long, graceful body and legs with a fairly long tail and a medium length head with a short straight nose making a distinct angle with the forehead. The "Russian" look is created by the large ears set on top of the head, the prominent whisker pads either side of the nose and the almond-shaped, vivid green eyes. A distinctive feature of this breed is its short, fine, velvety dense, clear blue coat which stands up from the body and shows a beautiful silvery sheen.

Korat - Breed No. 34

Another breed of medium foreign type with a blue coat, which is glossy and close-lying but short to medium in length, with silver tipping. The type differences between this and other breeds are that the back is gently curved and the head is heart-shaped when viewed from the front; the ears are large and set high and the nose has a slight downward curve. The eyes, which are particularly large and luminous, are a brilliant green, although an amber cast is acceptable in younger cats.

Classes 502 & 503 Cancelled - No Entries**Abyssinian**

The Abyssinian is of a similar medium foreign build to the Russian, but with a very different expression, the ears being set wide apart on the gently curved, medium wedge head, while the large oriental eyes are amber, hazel or green. The coat is very short and fine, each hair having two or three bands of colour on it, thus giving the breed its distinctive ticked appearance.

Classes 519 - 520 Cancelled - No Entries**Devon Rex - Breed No. 33a**

The Devon Rex is quite unlike any other breed of cat. The slender body is of medium length, the tail and legs are long, especially the hind legs, and the elegant neck tends to emphasise the head; this is wedge-shaped with full cheeks, a short muzzle, a strongly marked stop to the nose and large oval eyes. The big wide-based ears are set rather low on the head and the whisker pads are noticeable, particularly since the whiskers are crinkled. The coat, which may be any colour of any pattern, is very short, fine and soft and its waviness helps create the unique character of this breed.

PRELIMINARY STATUS FOREIGN BREEDS

The breeds in Assessment Classes are still at the earliest stage of recognition by the GCCF. Instead of having an Open Class, each cat is assessed individually against the standard of points for its breed; the judge then decides whether or not the cat conforms sufficiently closely to its standard to be awarded a Merit Certificate.
