ORIENTAL SECTION

The Orientals have the elongated foreign type of the Siamese, with the same elegant length of head, neck, body, legs and tail and the very short, glossy coat, but lack the gene which restricts the colour to the points. They are recognised in ten self colours and seven tortie colours, together with their silver versions, in a variety of patterns giving a total of over two hundred different colour schemes. The section also includes the Angora, the Oriental semi-longhair.
