Cat Welfare Trust

The Cat Fancy's own Charity. established 1988

Registered Charity No. 800719

cwt

The Cat Welfare Trust is the Fancy's own charity, set up by the GCCF in 1988. The Trust Deed was written to enable funds to be used for the widest possible range of activities to benefit cats. Currently the work of cat rescue is undertaken by GCCF Member Cat Clubs and so the Trust has turned to other ways of improving cat welfare.

Three projects have been completed so far, all of which have been funded because the subjects were of particular interest to pedigree cat owners and were not likely to attract commercial funding in their initial stages.

The first of these was a Ph.D. research project to study the preparation of a vaccine for ringworm and was undertaken by Ann Robinson at Bristol University Veterinary School. The second - the Genome Project was undertaken by Dr Matthew Binns of the Animal Health Trust and resulted in the identification and analysis of 211 markers on the feline genome map. The third - a study into feline chronic gingivostomatitis - was carried out by Kitty Healey at the University of Liverpool. Chronic gingivostomatitis is a condition familiar to many cat owners, this is a very painful disease affecting the gums and mouths of pet cats causing inflammation and ulceration and there is currently no cure for this condition. Kitty's research has established a link between this condition and FCV reinforcing the need for regular vaccination. Kitty's thesis summary can be seen on the GCCF website.

The current project is a study being conducted by Bristol University in conjunction with Manchester University and the University of California-Davis into the genes that play a pivotal role in the control of infectious diseases particularly Feline Infectious Peritonitis.

The study should also objectively determine relative levels of inbreeding in various breeds and whether the gene pool is dangerously narrow putting specific breeds at increased risk of inherited disorders and disease susceptibilities. Results of this latter part of the study should supplement the information available to the BACs when they look at their breeding policies and help encourage best practise.

The Trust is dependent on donations from the Clubs and members of the Fancy and so it is easy to see that in order to be able to make grants large enough to make a difference to cats' lives we rely on you for all the financial support possible. Donations and legacies to the Trust will ensure the continuation of this work. Please remember the Trust when you or your club consider welfare donations.

Please send donations to The Treasurer, Mrs Eileen Fryer, c/o GCCF, 5 King's Castle Business Park, The Drove, Bridgwater, TA64AG. Further information is also available from the GCCF Office.

You can help us maximise your support by enabling the Trust to reclaim tax on your donations under the Gift Aid scheme. All you need to do is to state that you pay Income Tax and wish the Cat Welfare Trust to treat your donation as Gift Aid.

Chairman's Welcome

I am delighted to welcome you to the GCCF 36th Supreme Championship Show, the most prestigious cat show in the calendar. In keeping with events in the UK this year the theme is 'Diamonds are Forever' and I am looking forward to admiring the spectacular decorated pens you all manage to produce. Also on show this year are the past Supreme title winners which will be well worth a look. The special fun, kitten class will be an added attraction during the day. A first for the Supreme this year is the inclusion of the Imperial classes which will no doubt have some great cats in them.

For help and advice on your favourite cats visit Club Row where experts from many clubs will be able to tell you almost anything you want to know about their breeds. Our new GCCF stand is located near the entrance to the hall where you can chat to some of the staff from the Bridgwater office and members of the Board of Directors when not otherwise occupied. Many useful leaflets and booklets are available including copies of the latest edition of 'GCCF News and Views'. For up to date information on anything GCCF visit our website www.gccfcats.org and our grateful thanks to Marcia Owen for carrying out all the work and changes involved on a daily basis.

It has been another exciting year for the GCCF with a splendid stand to host the World of Cats at the London Pet Show supported by our Clubs and cat breeders and the gala dinner. Our new partnership with Agria pet insurance is working well and the Breeders Reward Scheme although now only being accrued will be fully functional soon. The initial phase of the IT refresh project is almost complete and will be available for use once the final testing is complete. Watch out for the notice on the GCCF website.

The Young Exhibitor Scheme, YES, has captured the interest of our junior exhibitors with many working expertly through the levels. Well done to you all. Look out for many of them doing their presentations today.

Our GCCF Area and Breed Clubs have put on some wonderful shows during the year and the new Olympian Awards, where the Imperial titled cats of all breeds compete against each other, have been greatly sort after. Hopefully you will be able to spot some of the cats that have gained this superior title as you look around the exhibits today. For next year the GCCF is hosting The World Cat Congress on 18th and 19th May 2013 at Wood Green Animal Shelter, Godmanchester. A double show on the Saturday with the Suffolk and Norfolk Cat Club Show and GCCF World Cat Show followed by the Gala Dinner and a Seminar on the Sunday with world renown speakers. Details are available on the GCCF website.

A big thank you to Celia Leighton, our Show Manager, Sally Tokens and Lesley Szwed her section managers, the team of helpers including table leaders and workers, veterinary surgeons, judges and stewards who all work so hard to make this a fantastic day. Also our thanks and appreciation to Lisa Aggett for her work including advertising and publicity, Chris Wood for managing the hall and MF Penning for setting up the pens. Finally and especially a big thank you to all our exhibitors for bringing their wonderful cats. I hope both you and your cat have a rewarding and enjoyable day.

CATALOGUE

Ever since the first cat show was held in 1871, fanciers have had standards of excellence to aim for. At first there was minimal mention of the shape of the cats, the breeds differing mainly in coat length and colour, but the standards evolved, the breeds changed gradually and cats today are bred in a dozen distinct shapes.

Despite the differences in shape (or 'type') essential to the various breeds, no standard of points calls for extreme deviation from the basic mongrel cat shape and size, and deformities are severely penalised in all breeds, so that today's cats still move, feed and breed naturally.

PERSIAN SECTION

The breeds in this section are all Persian in type, varying only in their coat colour, markings and eye colour or, in the case of the Exotics, their coat length. They are big, solid cats with a cobby body, sturdy legs, a short tail and a broad round head with a short nose, small ears set wide apart and large round eyes; the effect is one of roundness and substance, enhanced by the beautiful coat which should be long, dense and silky in Persians, dense and plushy in Exotics.

SEMI-LONGHAIR SECTION

This section contains those longhaired breeds which are not of Persian type. The coat is usually less dense than that of the Persian and the head and body are rather longer than those of the Persian longhairs.

SEMI-LONGHAIR ADULTS

Birman

This is one of the earliest semi-longhair breeds to be recognised. Although, like the Persian, it should be massive and well-rounded, the body, legs and tail are a little longer than in the Persian and the ears slightly larger, while the nose is straight and of medium length. The eyes are almost round and must be a deep blue. The coat is long and silky. The unique characteristic of this breed is its white feet, the front feet having white "gloves" to cover the toes and the hind feet white "gauntlets" covering the paws and tapering up the back of the leg to the hock.

Norwegian Forest Cat - Breed No. 67

This large but elegant semi-longhaired breed originated as an outdoor working cat on Norwegian farms and its appearance should reflect this heritage. It is slow to mature, sometimes taking up to four years to develop fully, and has a distinctive double coat, but coat colour and pattern are irrelevant. The cats here are descended from imported stock, with no outcrosses to other breeds.

BRITISH SECTION

The British Shorthair is a powerful, compact cat with a sturdy body and legs, a shortish tail and a round head with small, widely-spaced ears, large, round eyes and a short, straight nose. The coat is short, dense and crisp rather than fine and close-lying like the Burmese or Siamese, but with no fluffiness to it.

Tabby British Shorthairs

In the British Tabbies the markings show up clearly on the short coat. The classic tabby pattern, with its "butterfly" marking on the shoulders and "oysters" on the flanks, and the mackerel pattern with thin unbroken lines running vertically from the spine are judged together. In the Spotted the markings consist of numerous clear spots of dark colour on a paler background, with no unbroken lines on the body or legs. In all except the Black Silver Tabbies and Spotties the eye colour is copper, orange or deep gold.

FOREIGN SECTION

The Foreign section encompasses twelve separate shapes of cat, further subdivided by coat and colour. They have a lithe elegance, intermediate in type between the chunky solidity of the Persians and British Shorthairs and the elongation of the Siamese and Orientals. They all have short coats except the Tiffanies which are included in this section because they are part of the Asian group.

FOREIGN ADULTS

Russian Blue - Breed No. 16

This breed has a long, graceful body and legs with a fairly long tail and a medium length head with a short straight nose making a distinct angle with the forehead. The "Russian" look is created by the large ears set on top of the head, the prominent whisker pads either side of the nose and the almond-shaped, vivid green eyes. A distinctive feature of this breed is its short, fine, velvety dense, clear blue coat which stands up from the body and shows a beautiful silvery sheen.

Korat - Breed No. 34

Another breed of medium foreign type with a blue coat, which is glossy and close-lying but short to medium in length, with silver tipping. The type differences between this and other breeds are that the back is gently curved and the head is heart-shaped when viewed from the front; the ears are large and set high and the nose has a slight downward curve. The eyes, which are particularly large and luminous, are a brilliant green, although an amber cast is acceptable in younger cats.

Abyssinian

The Abyssinian is of a similar medium foreign build to the Russian, but with a very different expression, the ears being set wide apart on the gently curved, medium wedge head, while the large oriental eyes are amber, hazel or green. The coat is very short and fine, each hair having two or three bands of colour on it, thus giving the breed its distinctive ticked appearance.

Cornish Rex - Breed No. 33

This breed has medium foreign body type but with particularly long legs and tail. The head is a medium wedge with a straight nose, large ears set rather high and medium sized oval eyes. The coat is short and plushy with a highly characteristic curl or wave to it, producing ripples all down the body to the tip of the tail; even the eyebrows and whiskers are crinkled. Cornish Rex may be any colour of any pattern.

Devon Rex - Breed No. 33a

The Devon Rex is quite unlike any other breed of cat. The slender body is of medium length, the tail and legs are long, especially the hind legs, and the elegant neck tends to emphasise the head; this is wedge-shaped with full cheeks, a short muzzle, a strongly marked stop to the nose and large oval eyes. The big wide-based ears are set rather low on the head and the whisker pads are noticeable, particularly since the whiskers are crinkled. The coat, which may be any colour of any pattern, is very short, fine and soft and its waviness helps create the unique character of this breed.

BURMESE SECTION

The Burmese is another breed of medium foreign type, neither as cobby as the British nor as elongated as the Siamese, but highly distinctive. The tail tapers only slightly and the head has a gently rounded look to its blunt wedge, with a distinct nose-break. The medium size ears are set well apart and tilt slightly forward and the gently slanting eyes, neither round nor oriental, vary in colour from champagne, through the ideal golden-yellow, to amber.

The Burmese Cat Club Benevolent Fund

(registered charity number 1094488)

Is the only charity devoted solely to caring for needy Burmese Cats.

It was established in the 1960s and became a Charitable Trust in 2002. The objectives of the trust relate to: 'the relief of suffering and distress of Burmese or other cats that are old, sick, unwanted, abandoned, lost or distressed; particularly by the provision of care and accommodation for such animals'.

Each year approximately 100 cats come into our care through no fault of their own. Cats in emergency situations are housed in suitable accommodation established across the country and available through our Welfare Officers and Regional Advisers. Veterinary expenses are in the region of £27,000 each year and we support several rehomes that have chronic health issues.

We rely a great deal on donations from both old and new owners and also from members who give generously for the love of the breed. For more information please contact -

ORIENTAL SECTION

The Orientals have the elongated foreign type of the Siamese, with the same elegant length of head, neck, body, legs and tail and the very short, glossy coat, but lack the gene which restricts the colour to the points. They are recognised in ten self colours and seven tortie colours, together with their silver versions, in a variety of patterns giving a total of over two hundred different colour schemes. The section also includes the Angora, the Oriental semi-longhair.

SIAMESE AND BALINESE SECTION

The Siamese type is the most elongated of all, but strong and beautifully balanced, with a long svelte, muscular body, fine legs and feet, a long tapering tail and an elegant neck. The head and large ears form a triangle and the oriental eyes slant towards the nose. The coat of the Siamese is very fine, short, glossy and close-lying, while that of the Balinese is silky and flowing. The colour is, of course, highly distinctive, the eyes being clear bright blue and the beauty of the coat lying in the contrast of the darker points and paler body colour.

SIAMESE AND BALINESE ADULTS

The Seal and Blue Point Siamese, the two earliest colours, share a UK Grand class.

Taken over by the Beasley family in 1999, we remain a family run business striving to improve our equipment and standard of service whilst maintaining the high levels of cleanliness that we are renowned for.

In spite of the troubled financial times we all find ourselves in, we have steadfastly re-invested in new equipment and bright clean pens to enable us to do any show, large or small or multiples of and to be a credit to the organisers.

If you are part of a show team and would require a quotation for your future show please contact us.

CLUB ROW

The Cat Fancy is made up of many Cat Clubs. Some of these are "area clubs" for cat enthusiasts living in a particular area; these are usually all-breed clubs and often include non-pedigree pets amongst their "breeds". Others are "specialist breed clubs" which cater for a particular breed or group of breeds throughout the country. Many of these clubs have information stalls here today so that members can meet for a chat and potential members can gather information about the clubs and about the various breeds. Many of the specialist breed clubs who are participating in this section have a display of the breeds for which they cater and several of them are exhibiting pedigree cats who were rescued by their Club Welfare group.
