

# CATALOGUE

Ever since the first cat show was held in 1871, fanciers have had standards of excellence to aim for. At first there was minimal mention of the shape of the cats, the breeds differing mainly in coat length and colour, but the standards evolved, the breeds changed gradually and cats today are bred in a dozen distinct shapes.

Despite the differences in shape (or 'type') essential to the various breeds, no standard of points calls for extreme deviation from the basic mongrel cat shape and size, and deformities are severely penalised in all breeds, so that today's cats still move, feed and breed naturally.

## PERSIAN SECTION

The breeds in this section are all Persian in type, varying only in their coat colour, markings and eye colour or, in the case of the Exotics, their coat length. They are big, solid cats with a cobby body, sturdy legs, a short tail and a broad round head with a short nose, small ears set wide apart and large round eyes; the effect is one of roundness and substance, enhanced by the beautiful coat which should be long, dense and silky in Persians, dense and plushy in Exotics.

**Black & Chocolate Smoke - Breed Nos. 6 & 6b**

*The face and feet of the Black Smoke are black and the body a pale silvery-white with black ends to the hairs so that what, in repose, might appear to be a black cat suddenly reveals, by moving, the true beauty of its contrasting undercoat. In the Chocolate Smoke, a more recent breed, the mask, feet and ends of the hair are chocolate.*
