### Birman

This is one of the earliest semi-longhair breeds to be recognised. Although, like the Persian, it should be massive and well-rounded, the body, legs and tail are a little longer than in the Persian and the ears slightly larger, while the nose is straight and of medium length. The eyes are almost round and must be a deep blue. The coat is long and silky. The unique characteristic of this breed is its white feet, the front feet having white "gloves" to cover the toes and the hind feet white "gauntlets" covering the paws and tapering up the back of the leg to the hock.

### Seal & Blue Point Birman

These two colour breeds are judged together in the Grand class.

### Norwegian Forest Cat - GEMS NFO

*This large but elegant semi-longhaired breed originated as an outdoor working cat on Norwegian farms and its appearance should reflect this heritage. It is slow to mature, sometimes taking up to four years to develop fully, and has a distinctive double coat, but coat colour and pattern are irrelevant. The cats here are descended from imported stock, with no outcrosses to other breeds.*

*This semi-longhaired breed of medium foreign type originated in the USA, and is bred in a wide variety of colours, often with white markings. This breed is more rectangular than the Norwegian Forest Cat and the head shape is less angular.*
