

Section 5

The Burmese is another breed of medium foreign type, neither as cobby as the British nor as elongated as the Siamese, but highly distinctive. The tail tapers only slightly and the head has a gently rounded look to its blunt wedge, with a distinct nose-break. The medium size ears are set well apart and tilt slightly forward and the gently slanting eyes, neither round nor oriental, vary in colour from chartreuse, through the ideal golden-yellow, to amber.

Asians

The Asian breeds were mainly developed from a cross between Burmese and Chinchillas, although some Asian Selves were developed from crosses between Burmese and other shorthairs. They have Burmese type and coat quality but are seen in a vast range of colours and patterns.

Both these breeds can be found in Section 4 of a GCCF cat show. The cat below is a Sphynx while the cat opposite is a LaPerm. Both these photos were taken by Gina Rymer one of the GCCF Supreme Cat Shows photographers. She has managed to catch the inherent playful nature of both breeds.
