

## Section 6

The Orientals have the elongated foreign type of the Siamese, with the same elegant length of head, neck, body, legs and tail and the very short, glossy coat, but lack the gene which restricts the colour to the points. They are recognised in ten self colours and seven tortie colours, together with their silver versions, in a variety of patterns giving a total of over two hundred different colour schemes. The section also includes the Angora, the Oriental semi-longhair.

### Oriental Cream & Oriental Apricot - GEMS OSH e, OSH em

*The Cream is the dilute version of the Red with a cool cream coat, preferably free from tabby markings. The presence of the dilute modifier gene (which produces the Caramel colour) converts Cream to Apricot - a hot cream with a metallic sheen which becomes more noticeable as the cat matures. Both colours have green eyes.*

- 550 Oriental Cream or Apricot Adult** Mrs J Starr  
*Entered for Best of Breed only*

*The Siamese type is the most elongated of all, but strong and beautifully balanced, with a long svelte, muscular body, fine legs and feet, a long tapering tail and an elegant neck. The head and large ears form a triangle and the oriental eyes slant towards the nose. The coat of the Siamese is very fine, short, glossy and close-lying, while that of the Balinese is silky and flowing. The colour is, of course, highly distinctive, the eyes being clear bright blue and the beauty of the coat lying in the contrast of the darker points and paler body colour.*

*Tabby Points in seal (SIA n 21), blue (SIA a 21), chocolate (SIA b 21), lilac (SIA c 21), cinnamon (SIA o 21), caramel (SIA m 21), fawn (SIA p 21), red (SIA d 21), cream (SIA e 21) and apricot (SIA em 21), plus the seven tortie colours (SIA f 21, SIA g 21, SIA h 21, SIA j 21, SIA k 21, SIA q 21, SIA r 21) all now have Championship status. The points colour and body colour are equivalent to those in the solid colour versions. The mask is striped, with spotted whisker pads, the tail shows clear rings and the legs have broken stripes. The ears have paler central areas known as "thumb marks" although these often do not show so well on dilute colours or on the Tortie Tabbies where the ears are mottled.*

### **Oriental Longhair - GEMS OLH \***

*This breed differs from the Oriental shorthairs only in its coat length. It is found in the whole range of Oriental colours and patterns and, like the Balinese, has a silky flowing coat, lacking the thick undercoat found in many semi-longhairs and quite unlike the long, thick coat of the Persian.*

### **Balinese - GEMS BAL**

*This breed is the longhaired equivalent of the Siamese, being identical in shape and bred in all the Championship Siamese colours, plus Caramel and Apricot, with the same blue eyes. The coat is fairly long and silky, especially on the plume-like tail. These cats are bred from Siamese and are completely unrelated to the Colourpoint long-hairs.*
